Morris Forms Corporation Available Security Features

<p>HEAT REACTIVE INK SECURITY LOCK</p> <p>The logo will disappear from finger heat & reappear to verify an official document. This is our most secure security feature.</p>	<p>VOID COPY FEATURE</p> <p>This is a screen that has the word "VOID" hidden in the background. When photocopied or scanned the word "VOID" appears across the copied image. Please note that this may not work with all copiers.</p>
<p>SCHOOL CREST OR LOGO</p> <p>Promotes School Image.</p>	<p>MICRO PRINT LINE</p> <p>A great security feature that stops counterfeiting. Microprinting involves printing very small text, too small to read with the naked eye and can't be reproduced with inkjet/laser printers or copiers.</p>
<p>WARNING BORDER</p> <p>Tells parents and school officials this is an original report card and what security features are contained in the report card.</p>	<p>SECURITY PAPER WITH VISIBLE FIBERS & WATERMARK</p> <p>This paper is visibly recognizable containing small fibers imbedded in the paper. Also a watermark is revealed when held up to the light. This ad is actually printed on our security paper.</p>
	<p>CONSECUTIVE NUMBERING ON REVERSE SIDE OF REPORT CARD.</p> <p>Administrators are able to track original report cards. Please see back of this ad for actual sample.</p>
	<p>20591551</p>
